

Fee Schedule for GIS

Online Subscription Access Users Fee

Item Requested	Description	Unit Price
Public Viewer:	There will be a free public viewer that allows the user to view base data layers (ortho-imagery, parcels, street center- lines, ownership, and addresses) and a subset of tax information for a selected parcel.	
Individual Subscription for Enhanced Web Access Service:	Permits an individual user to view and print GIS data extracted from the County's electronic map. This service allows the user to view and print all available information for any selected parcel as often as needed. A subscription provides on-line access for one month. All base data layers (orthoimagery, parcels, street center-lines, addresses, and two feet contours), a subset of tax information, oblique imagery, comparable sales reports, and property record card information are included. This provides a purchaser with access to the most recent information.	<p>\$10.00 per Month</p> <p>\$100 per year</p>

Digital GIS Data Fee

Item Requested	Description	Unit Price
Data Extract for Project Area	GIS data extracted from the County's electronic map and provided in shapefile (.shp) format. The smallest purchasable unit is one public land survey section (PLSS). This product includes parcels and ownership, street centerline, and boundary data. Future updates and technical support are not included with this package.	\$20.00 per section
Countywide Data Extract -	GIS data extracted from the County's electronic map and provided in the format required by the user. The County could provide the raw data or formatted digital map. Future updates and technical support are not included in this package.	\$1,500.00

Paper Map Fees-using standard layer (ortho, parcels, street centerlines, topo, and address points)
 Maps will generally be completed within 48 hours of request.

Item Requested	Description	Unit Price
